Subject Index of Volume 30

a.c. Analogue circuit
synthesis of, impedance measurements of Pb/Na sulphate system, 287
Activators
influence of, and inhibitors on positive active material of lead/acid batteries, 107
Active mass
measurement of contact resistance between, and current collector in lead/acid battery electrodes, 315
Additive(s)
design of, to enhance performance of Pb anode in sulphuric acid, 193
electrode processes in Pb/H_2SO_3+, systems, 177
organic, effect of, on lead/acid negative plate, 185
Aggregate-of-sphere model
of $PbO_2/PbSO_4$ electrode (Kugelhaufen), 209
Anodic polarization
mathematical models for, of lead/acid positive electrode, 237
Antimony
influence of As, Sb and Bi on properties of lead/acid battery positive plates, 117
kinetics of hydrogen evolution reaction on lead/acid battery negative plates with silicate and Sb added to electrolyte, 169
Arsenic
influence of As, Sb and Bi on properties of lead/acid battery positive plates, 117
Automotive lead/acid batteries
impedance studies of intercell welds in, 301
modelling cold-cranking performance of, 249

Battery(ies)
lead/acid
crystal growth of PbO_2 and its relation to capacity loss of positive plates in sealed, 13
degradation of positive plate of, during cycling, 131
energetic coefficient in, positive plates, 153
impedance studies of intercell welds in automotive, 301
influence of activators and inhibitors of positive active material of, 107
influence of As, Sb and Bi on properties of, positive plates, 117
kinetics of hydrogen evolution reaction on, negative plates with silicate and Sb added to electrolyte, 169
mathematical modelling of tubular-plate, 227
measurement of contact resistance between active mass and current collector in, electrodes, 315
modelling cold-cranking performance of automotive, 249
negative active mass; impedance of porous electrochemical systems, 269
non-stationary impedance analysis of, 275
passivation of positive electrode of; consequence of self-discharge, 47
processes at micro-level in oxidation of $PbSO_4$ to PbO_2 during charging of, positive plates, 77
simplified model of, 201
time effects in conductivity measurements of, electrodes, 309
Bismuth
influence of As, Sb and Bi on properties of lead/acid battery positive plates, 117

Calcium
Pb–Ca–Sn grids, phenomena at interface between positive active material and, 23

Elsevier Sequoia/Printed in Switzerland

Capacity
determination of discharge time and, by short-period discharge method, 257
Capacity loss
of positive plates in sealed lead/acid batteries, crystal growth of PbO_2 and its relation to, 13
Charging regime
behaviour of $PbO_2/PbSO_4$ electrode with regard to, and small additions of phosphoric acid to sulphuric acid electrolyte, 99
Cold-cranking performance
of automotive lead/acid batteries, modelling, 249
Conductivity measurements
time effects in, of lead/acid battery electrodes, 309
Contact resistance
measurement of, between active mass and current collector in lead/acid battery electrodes, 315
Crystal growth
of PbO_2 and its relation to capacity loss of positive plates in sealed lead/acid batteries, 13
Current collector
measurement of contact resistance between active mass and, in lead/acid battery electrodes, 315
Currentless passivation
of PbO_2 electrode with respect to influence of Sn, 41
Current–potential curves
mathematical modelling of, for Pb/H_2SO_4 system, 243
Cycling
degradation of positive plate of lead/acid battery during, 131

Degradation
of positive plate of lead/acid battery during cycling, 143
Discharge time
determination of, and capacity by short-period discharge method, 257

Electrical resistance
method and device for testing separators by measuring local transverse, 321
Electrochemical systems
impedance of porous; study of negative active mass of lead/acid battery, 269
Electrode(s)
mathematical models for anodic polarization of lead/acid positive, 237
measurement of contact resistance between active mass and current collector in lead/acid battery, 315
passivation of positive, of lead/acid battery; consequence of self-discharge, 47
PbO_2
currentless passivation of, with respect to influence of Sn, 41
insertion mechanism of, 143
$PbO_2/PbSO_4$
aggregate-of-spheres (Kugelhaufen) model of, 209
charging regime and small additions of phosphoric acid to sulphuric acid electrolyte, behaviour of, with regard to, 99
in sulphuric acid containing Sn ions, behaviour of, 33
time effects in conductivity measurements of lead/acid battery, 309
Electrode processes
in Pb/H_2SO_4 + additive systems, 177
Electrolyte
kinetics of hydrogen evolution reaction on lead/acid battery negative plates with silicate and Sb added to, 169
Energetic coefficient
in lead/acid battery positive plates, 153

Film formation
in Pb(II) region of Pb/H_2SO_4 system, 161

Gaston Planté Medal
address, 7
Ernst Voss; medallist 1989, 3

Hydrogen evolution reaction
kinetics of, on lead/acid battery negative plates with silicate and Sb added to electrolyte, 169

Impedance
of porous electrochemical systems; study of negative active mass of lead/acid battery, 269
Impedance analysis
non-stationary, of lead/acid batteries, 275

Impedance measurements
of Pb/Na sulphate system; synthesis of a.c. analogue circuit, 287
Impedance studies
of intercell welds in automotive lead/acid batteries, 301
Inhibitors
influence of activators and, on positive active material of lead/acid batteries, 107
Insertion mechanism
of Pb dioxide electrode, 143
Intercell welds
impedance studies of, in automotive lead/acid batteries, 301

Kinetics
of hydrogen evolution reaction on lead/acid battery negative plates with silicate and Sb added to electrolyte, 169
Kugelhaufen
aggregate-of-spheres model of PbO_2/$PbSO_4$ electrode, 209

Lead
aggregate-of-spheres (Kugelhaufen) model of PbO_2/$PbSO_4$ electrode, 209
behaviour of PbO_2/$PbSO_4$ electrode in sulphuric acid containing Sn ions, 33
–Ca–Sn grids, phenomena at interface between positive active material and, 23
currentless passivation of PbO_2 electrode with respect to influence of Sn, 41
electrode processes in Pb/H_2SO_4+additive systems, 177
film formation in Pb(II) region of Pb/H_2SO_4 system, 161
impedance measurements of Pb/Na sulphate system; synthesis of a.c. analogue circuit, 287
mathematical modelling of current–potential curves for Pb/H_2SO_4 system, 243
PbO_2/$PbSO_4$ electrode, behaviour of, with regard to charging regime and small additions of phosphoric acid to sulphuric acid electrolyte, 99
processes at micro-level in oxidation of $PbSO_4$ to PbO_2 during charging of lead/acid battery positive plates, 77
Lead/acid battery(ies)
crystal growth of PbO_2 and its relation to capacity loss of positive plates in sealed, 13
degradation of positive plate of, during cycling, 131
energetic coefficient in, positive plates, 153
impedance studies of intercell welds in automotive, 301
influence of activators and inhibitors on positive active material of, 107
influence of As, Sb and Bi on properties of, positive plates, 117
kinetics of hydrogen evolution reaction on, negative plates with silicate and Sb added to electrolyte, 169
negative active mass of; impedance of porous electrochemical systems, 269
non-stationary impedance analysis of, 275
mathematical modelling of tubular-plate, 227
modelling cold-cranking performance of automotive, 249
passivation of positive electrode of; consequence of self-discharge, 47
processes at micro-level in oxidation of $PbSO_4$ to PbO_2 during charging of, positive plates, 77
simplified model of, 201
Lead/acid battery electrodes
measurement of contact resistance between active mass and current collector in, 315
time effects in conductivity measurements of, 309
Lead/acid negative plate
effect of organic additives on, 185
Lead/acid positive electrode
mathematical models for anodic polarization of, 237
Lead anode
design of additives to enhance performance of, in sulphuric acid, 193
Lead dioxide
crystal growth of PbO_2 and its relation to capacity loss of positive plates in sealed lead/acid batteries, 13
Lead dioxide electrode
insertion mechanism of, 143
Lead sulphate
oxidation mechanisms of, in sulphuric acid, 55

Mathematical modelling
of current–potential curves for Pb/H_2SO_4 system, 243
of tubular-plate lead/acid batteries, 227
Mathematical models
for anodic polarization of lead/acid positive electrode, 237

Negative active mass
of lead/acid battery; impedance of porous electrochemical systems, 269
Negative plate(s)
effect of organic additives on lead/acid, 185
kinetics of hydrogen evolution reaction on lead/acid battery, with silicate and Sb added to electrolyte, 169

Organic additives
effect of, on lead/acid negative plate, 185
Oxidation
of $PbSO_4$ to PbO_2 during charging of lead/acid battery positive plates, processes at micro-level in, 77
Oxidation mechanisms
of Pb sulphate in sulphuric acid, 55

Passivation
currentless, of PbO_2 electrode with respect to influence of Sn, 41
of positive electrode of lead/acid battery; consequence of self-discharge, 47
Phosphoric acid
behaviour of $PbO_2/PbSO_4$ electrode with respect to charging regime and small additions of, to sulphuric acid electrolyte, 99
Positive active material
of lead/acid batteries, influence of activators and inhibitors on, 107
phenomena at interface between, and Pb–Ca–Sn grids, 23
Positive electrode
of lead/acid battery, passivation of; consequence of self-discharge, 47
Positive plates
crystal growth of PbO_2 and its relation to capacity loss of, in sealed lead/acid batteries, 13
degradation of, of lead/acid battery during cycling, 131
energetic coefficient in lead/acid battery, 153
influence of As, Sb and Bi on properties of lead/acid battery, 117
processes at micro-level in oxidation of $PbSO_4$ to PbO_2 during charging of, lead/acid battery, 77

Self-discharge
passivation of positive electrode of lead/acid battery; consequence of, 47
Separators
method and device for testing, by measuring local transverse electrical resistance, 321
Short-period discharge method
determination of discharge time and capacity by, 257
Silicate
kinetics of hydrogen evolution reaction on lead/acid battery negative plates with, and Sb added to electrolyte, 169
Sodium sulphate
impedance measurements of Pb/Na sulphate system; synthesis of a.c. analogue circuit, 287
Sulphuric acid
behaviour of $PbO_2/PbSO_4$ electrode with regard to charging regime and small additions of phosphoric acid to, electrolyte, 99
behaviour of $PbO_2/PbSO_4$ electrode in, containing Sn ions, 33
design of additives to enhance performance of Pb anode in, 193
electrode processes in Pb/H_2SO_4 + additive systems, 177
film formation in Pb(II) region of Pb/H_2SO_4 system, 161
mathematical modelling of current–potential curves for Pb/H_2SO_4 system, 243
oxidation mechanisms of Pb sulphate in, 55

Time effects
in conductivity measurements of lead/acid battery electrodes, 309
Tin
behaviour of $PbO_2/PbSO_4$ electrode in sulphuric acid containing Sn ions, 33
currentless passivation of PbO_2 electrode with respect to influence of, 41
Pb–Ca–Sn grids, phenomena at interface between positive active material and, 23
